

ARCHVIZ ANIMATION SOFTWARE

ARCHLine.XP LIVE is an easy to use, affordable tool to turn your 3D design into an immersive model, creating high quality visualization images, videos and live walkthroughs.

No rendering time

so that you can react to clients' requests immediately, and make changes on the fly.

Animation

By using gaming-standard WASD+mouse controls, you can move in your model without restrictions, producing images, panorama 360° videos, and self-executable motion files.

People

Human characters such as casual, business or sports.

Lights

Define and animate the Sun path, simulate natural light. Use lamps, and other light sources, turn them on/off at will.

Environment

Add landscapes, animated vegetation and materials to bring your design to life.
Foliage: trees, shrubs, grass, flowers.

Water

Simulate swimming pools, seaside, etc.

Norsk leverandør:
Infinity Innovations as
www.infinity.no

Technical background: Powered by the UNREAL engine. Provides seamless data transfer from ARCHLine.XP. Supports other CAD/BIM software via the FBX file format.
